

Bristol PRECISION

Company Overview

Bristol Precision, Inc. is a CNC manufacturing company specializing in high-precision components for the aerospace, medical, and defense industries. With state-of-the-art technology, a highly skilled team, and a relentless commitment to quality, we deliver precision-machined components that meet the most demanding industry standards.

Core Competencies

Precision CNC machining (5-axis mills and mill/turn lathes)

Prototyping & small to medium production runs

Custom tooling & fixture design

Advanced QA equipment & processes

Laser marking, serialization & data matrix bar-coding

Differentiators

AS9100 & ISO 13485 certified

ITAR registered

Proven track record with leading aerospace & medical companies

Highly skilled & experienced workforce

Commitment to on-time delivery & customer satisfaction

2022 Massachusetts SBA Manufacturer of the Year

CAPABILITY STATEMENT

NAICS Codes

332710: Machine Shops

332721: Precision Turned Product
Manufacturing

333514: Special Tool & Die, Die Set,
Jig & Fixture Manufacturing

332313: Plate Work Manufacturing

332999: All Other Misc. Fabricated
Metal Product

336411: Aircraft Manufacturing

334519: Measuring & Controlling
Device Manufacturing
